

TietoEnator in St. Petersburg

Igor Iartym
Director, St. Petersburg Office

The Future of the Enterprise Workspace

- § Moving from application-based to task-oriented
 - People perform tasks rather than use applications

- § Moving from fixed to mobile
 - WiFi in office
 - People work out-of-office, remotely, at their convenience
 - Global virtual teams – the meaning of "office hours" is redefined

- § Moving from separated to unified communications
 - Mail, IM, presence, directory, voice, video in one

- § Moving from separated to converged infrastructure
 - One network for data and voice
 - At most two devices per user

Who will Benefit from That?

- § Enterprise – competitive advantage
 - Cost savings
 - Productivity increase
 - Improved business processes

- § Employees – employee satisfaction
 - Better work-private life ballance
 - Better performance
 - Higher achievements, pays and benefits

- § End users – customer satisfaction
 - Time saving
 - Alternatives and convenience
 - Lower price per transaction

The best way to predict the future is to create it...

...Lets create it together
